JOSHUA OZORJI

JUNIOR MERN FULLSTACK WEB DEVELOPER

OBJECTIVE

Currently, I'm enthusiastic on writing clean codes and understanding the logic behind it, this gives me the push to work/collaborate on projects more challenging than my previous.

EXPERIENCE

HNG INTERN: JUNE – JULY 2024

- ✓ Partnered with designers to transform Figma designs into functional and attractive user interfaces.
- ✓ Teamed up with colleagues to create and optimize boilerplate code for new products, boosting development efficiency and uniformity.
- ✓ Designed and styled user interfaces, ensuring optimal functionality across diverse screen sizes and devices.

RECENT PROJECTS

SOCIAL HUB

A social media application built with the MERN stack. Inspired by Twitter, it enables users to create and delete posts, view others' posts, follow and unfollow users, like and comment on posts, manage user profiles, and receive notifications.

APPOSWIFT

Food Ordering App. It offers comprehensive search, sort, filter, and pagination options. Users can effortlessly manage restaurants, upload images, and handle shopping carts with Stripe integration for secure checkout, alongside a real-time order tracking status. MERN stack was utilized for this project.

RESERVA BOOKING

Hotel/Apartment Booking App. Inspired by Booking.com featuring advanced searching, sorting, and filtering, seamless pagination, Stripe-integrated payments, sophisticated forms, image uploads, and effortless hotel/apartment management
